

Aluminum Vise Clamps

Aluminum Vise Clamps are bolt-operated clamps used to connect a mainline conductor to equipment/apparatus or to make a turn at a deadend pole.

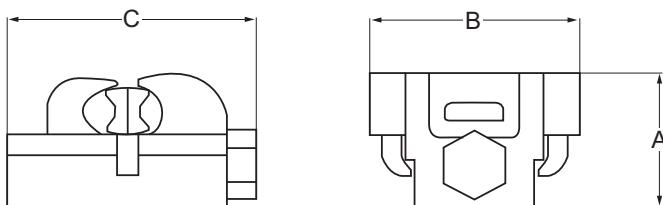

Features

- For use on an ACSR or aluminum main conductor
- Accepts ACSR, aluminum, or copper in the tap position
- Inhibitor applied to the main and tap grooves
- Each model accepts a range of conductor sizes
- Meets ANSI C119.4 requirements
- Optional neoprene grommets installed on the spacer makes for easier hot stick installation
- Optional snap-on plastic cover available for each model

Materials

Main Body.....	Aluminum Alloy
Jaw.....	Aluminum Alloy
Spacer.....	Aluminum
Bolt.....	Stainless Steel
Grommets (optional).....	Neoprene
